Role: Backend Java Developer (8+ Years Experience)

Work Authorization: OPT EAD – Authorized for immediate U.S. employment

Summary

Backend Java Developer with 8+ years of experience in **Java web application development, full-stack Java engineering, Spring Boot microservices, REST APIs, SOAP services, Hibernate ORM, Drools rule engine, ETL pipelines, and scalable distributed systems**. Strong exposure to **Agile/Scrum**, CICD, GitHub workflows, production debugging, and complex multi-application environments. Skilled in **Cucumber BDD**, JUnit, Angular/React UI integration, MongoDB, SQL, and cloud-native microservices. Experienced in fraud analytics, rule-based automation, and large-scale fintech/energy platforms.

Proficiency: Java, Python, Spring Boot, REST, SOAP, Microservices, Drools, Hibernate, ETL Pentaho, Cucumber (Java/Ruby), JUnit, GitHub, AWS, Docker, Splunk, BigQuery, Angular, React, MongoDB, SQL, Agile, POJO Architecture

Technical Skills

Languages: Java (Core/EE), Python

Frameworks: Spring Boot, Spring MVC, Hibernate, Drools, Struts, Angular, React

Web Services: REST APIs, SOAP services, Microservices Architecture

Tools: GitHub, Docker, AWS, Maven, JUnit, Cucumber (BDD Ruby/Java), ETL Pentaho, Splunk, BigQuery

Databases: MongoDB, MSSQL, Oracle, IBM Db2, SOQL, JDBC

Concepts: OOP, POJO Design, Multithreading, Transaction Handling, Rule Engines, Agile/Scrum, Scalable Architecture

OS: Linux, Unix, Windows

Experience

Backend Java Developer — Manipal Technologies Ltd

2016 – 2020

Java, Spring Boot, REST, SOAP, Hibernate, Drools, ETL Pentaho, MongoDB, SQL

- Developed enterprise-grade **Java backend services and full-stack Java web applications** using Spring Boot, REST, SOAP, and MVC.
- Built and integrated **REST and SOAP APIs** supporting high-throughput financial workflows across multi-application ecosystems.
- Implemented Drools rule engine with POJO architecture improving fraud capture by **80%**.
- Designed ETL Pentaho ingestion pipelines for large-scale financial data processing.
- Reduced false positives by **83%** with optimized rule design and analytics.
- Automated decision evaluation reducing review effort by **40%** and saving **B2M+ annually**.
- Used GitHub for version control, Agile/Scrum ceremonies, and CI/CD deployments.
- Built dashboards and log analytics through **Splunk + BigQuery**.

Product Developer — MVR Info Systems

2012 – 2016

Java Web Application Development, REST, Spring Boot, Hibernate, Embedded C/C++, Angular

- Built backend services for a **Smart Energy Alert System** including REST APIs, database layer, and alert triggers.
- Contributed to UI workflows using Angular for real-time energy visualization.

Salesforce Programmer Analyst — Oregon State University

Jul 2022 – Oct 2023

- Conducted UAT, regression analysis, and workflow validation within Agile sprints. Diagnosed and fixed production issues.

Education

M.S. Computer Science (AI Minor), GPA 3.67 — Oregon State University, USA

May 2022 – Mar 2025
